

# EQUINE MANAGEMENT EDUCATION PROGRAMS

Credit: Paige Gilberti

**Join us for one, two, or all three tours highlighting best management practices at three New Jersey equine facilities.**

We'll tour the facilities and discuss the different practices that are used at each location. Topics will include water quality issues, toxic plants, manure management, composting, rotational grazing, drainage, stream buffers and more. Anyone who is interested is welcome to attend.

**RUTGERS UNIVERSITY EQUINE FARM,**  
Ryders Lane, New Brunswick  
May 5, 2014. 5-6:30PM

This walking tour will demonstrate best management practices for equestrian properties, including composting and manure management, and toxic plant control.

**SEATON HACKNEY STABLES,**  
440 South Street, Morristown  
May 12, 2014. 5-6:30PM

Tour the water quality improvements made to this farm, including stream buffers and manure and pasture management.

**LORD STIRLING STABLES,**  
256 S. Maple Avenue, Basking Ridge  
May 19, 2014. 5-7:00PM

After a tour of the facility, join us for a discussion with Associate Professor Mike Westendorf from the Rutgers Equine Science Center on rotational grazing, drainage, and best management practices. This segment will also review before-and-after pictures of all three farms.

**These events are free of charge, and no registration is necessary!**

Hosted by Great Swamp Watershed Association, Rutgers Equine Science Center & Lord Stirling Stables
