from
Winery TBA**

Who:

New Jersey equine farmers and owners interested in nutrition and sustaining the environment

What:

Environmental management priorities on equine farms

- Funding opportunities available for horse farms through EQIP
- Program eligibility and signup
- Soil health demonstration and Best Management Practices (BMP)'s Tour
- Wine tasting and networking

Natural Resources Conservation Service

Why:

This free program will expose you to some of the latest in environmental research for equine farms, provide information on how to manage diet to decrease nutrient excess on horse farms, help you to understand USDA's NRCS funding programs, give you an opportunity to sign-up for these programs, and give you a chance to network with other managers and owners of New Jersey equine farms.

The Environmental Quality Incentives Program (EQIP) is a voluntary conservation program administered by USDA's Natural Resources Conservation Service (NRCS). All eligible agricultural producers including livestock, forestry, and organic production can apply. EQIP offers financial and technical assistance to implement conservation practices on eligible agricultural land.

For more information and to RSVP, please contact:

Dr. Mike Westendorf at michael.westendorf@rutgers.edu or

Dr. Carey Williams at carey.williams@rutgers.edu

Reasonable accommodations available upon request. Please make request upon registration.
