Cream Ridge, New Jersey**

Nutrition, New Pasture Varieties, Grazing Behavior, Manure and More!

The event is FREE!
Wine tastings, glasses and bottles can be purchased separately.
PLEASE register below!

Wine Tasting

Who:

New Jersey equine farmers and owners interested in nutrition and sustaining the environment.

What:

“Environmental Impacts of Equine Operations” is a USDA sponsored project with participating states from throughout the US (Delaware, Florida, Kentucky, Maine, Maryland, Massachusetts, Minnesota, New Jersey, North Carolina, Pennsylvania).

This free program will expose you to some of the latest in nutrition and environmental research from experts around the US.

Why:

We like to take advantage of bringing you the latest information ‘right from the horse’s mouth’! The program will provide research based information on how to manage diets and pasture, along with some other environmentally friendly horse farm practices directly from the experts performing the research. This will also give you a chance to network with other managers and owners of New Jersey equine farms.

Wine tasting (if interested) will start at 5:00.

There will be light food available.

Program talks will start at 6:00.
